

# Add Agility, Flexibility & Security to Any Business Technology

Technologent's **Secure Connectivity Practice** will provide innovative network solutions that empower our clients' success. We are committed to building long-term partnerships by designing scalable solutions that evolve with our clients' needs, while always prioritizing the highest levels of security, reliability, and performance.

## SECURE

Hybrid-Cloud-Networking

## SECURE

Transport

## SECURE

Access

## Comprehensive Assessments

A critical factor affecting the performance of any network is the proper placement of access points, the selection of the correct hardware, and the identification of interfering sources. Technologent's suite of assessment and survey service offerings are designed to identify gaps in current infrastructure systems.

### PRIMARY ASSESSMENTS

- Network Assessment
- Wireless Assessment
- Firewall Assessment
- Application Performance Assessment

## Other Popular Solutions

- WiFi-6/WiFi Technologies
- Software Defined Wide Area Networking
- Software Defined Secure Data Center
- Automation & Orchestration
- Cloud Solution Networking
- Office Move & Remodels
- Life Cycles & Refreshes
- Applications & Hardware Change, Upgrade, or Deployment

## Industry Expertise

### MANUFACTURING

Allow your business to build and create the products it needs to, with the ability to scale your network to any demand.

### HEALTHCARE

Keep your client's data in a network that is secure for the modern era of cybersecurity and data protection.

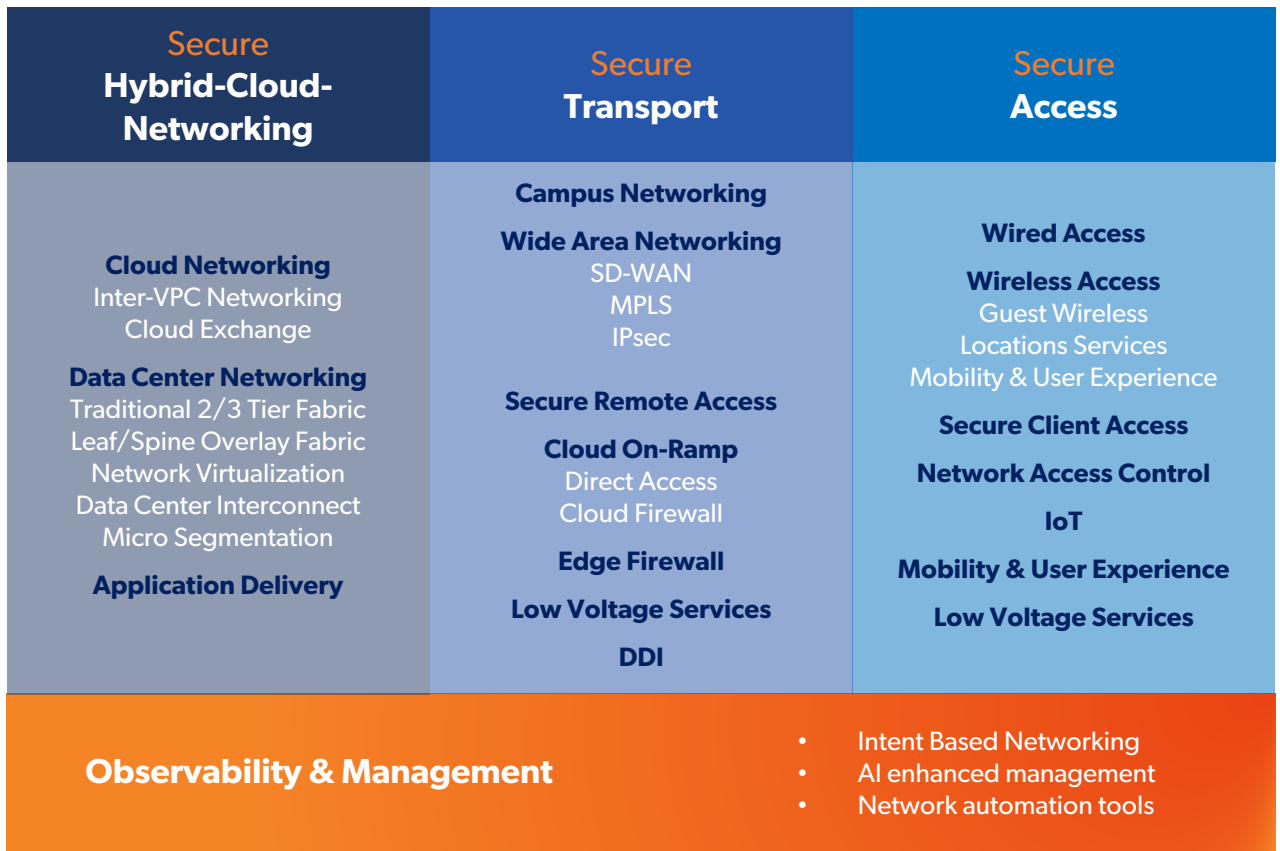

### FINANCE

Ensure valuable assets stay protected and transactions are instantaneous as possible.

### GAMING & HOSPITALITY

120 years of aggregate network gaming experience. Worked with large multi-state gaming companies, Tribal gaming, and more!

# Secure Connectivity Breakdown

## Solution Spotlight: Secure Campus

Experience the Next Generation Enterprise Campus for your organization. Complete with integrations for wireless, virtualized transport, software-defined networking, data intelligence and micro-segmentation, Technologist can enable your environment to deliver modern technology capabilities such as:

- **Mobile Workforce**
- **BYOD**
- **IoT**
- **Internet connectivity**
- **Cloud Apps**
- **Social Media**
