

A Little Bit Different

teknion

At Teknion, we take pride in being a family owned company that has helped organizations around the world work smarter by working better, and we are confident we can do the same for you.

Teknion has grown from a small, scrappy startup to one of the largest manufacturers of contract furniture in the world.

Teknion was founded in 1983 by Saul Feldberg, with three employees and 3,000 square feet of space. Stepping into the position of president and CEO in 1993, his son David Feldberg has continued to guide the growth of Teknion into a company encompassing 2.5 million square feet of facilities and 18 focused manufacturing facilities worldwide.

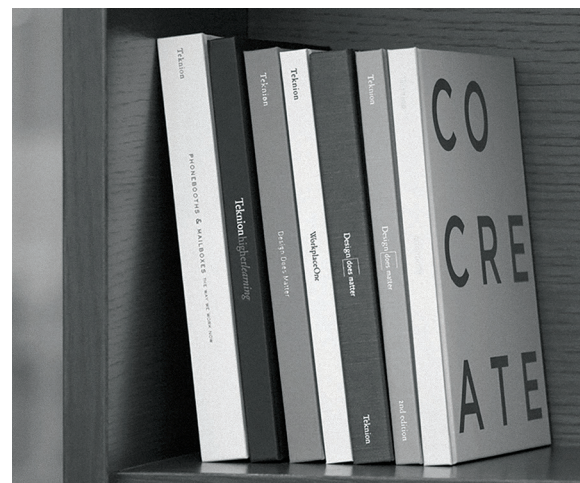

teknion

Teknion is a global brand with a local feel, committed to empowering people through design. Our story starts more than 30 years ago, when David and Saul Feldberg set out to build an enterprise of creative collaborators. That story is still evolving, and with each new day we challenge what's possible. Teknion is a little bit different—more approachable, more open to collaborative investigation, more focused on the right solution for each client.

Core Capabilities

- Furniture Innovation and Design
- Workplace Strategy
- Change Management
- Worldwide, State-of-the-Art Manufacturing
- Custom Product Capabilities
- Factory Project Manager Representative
- Shipping and Logistics

Creative Collaborators

Every project is a collaboration that leads to a solution aligned with your brand. Modifying our products to suit you is not outside of our process. It *is* our process.

Entrepreneurial

We keep the layers of decision-making to a minimum, bringing clients agility and accessibility.

Human

We're accessible, empathetic, thoughtful human beings—members of a big company that acts like a small company and feels more like a family.

Vertically Integrated

Our manufacturing story began with a commitment: to own our own manufacturing capabilities.

We are co-creators with our clients.

Universally Aligned

Through ownership and control of our global supply chain, we employ a 360-degree approach to delivering local service on a global level.

Enduring

This dictum steers our design and development philosophy—that the solution we arrive at with you meets the entire spectrum of your needs.

Sustainable

Sustainability is a cultural imperative within our company. Instead of focusing on doing the least harm, we focus on doing the most good.

“Teknion worked with us to customize certain pieces. Their flexibility and design expertise was a critical element of the successful outcome.”

– Keith Metzger, Director of Corporate Real Estate and Administration, Subaru

“Five Below really wanted something different, could utilize for what they do being a retailer. to move things around and various areas for

– Scott Allen, Director, Project Management, CBRE

something flexible, something that they They wanted storage for products, the flexibility collaboration.”

“The furniture allowed such endless creativity.”

– Michael Romanko, Executive Vice President, Five Below

studio TK

Studio TK is helping to change the culture of work. With our exclusive focus on social applications, we are creating spaces that are responsive to all the ways we work and all that our work demands. From quiet focus to creative collaboration, social spaces are creating a new type of workplace that is improving well-being and increasing productivity across the office.

Foster Connections

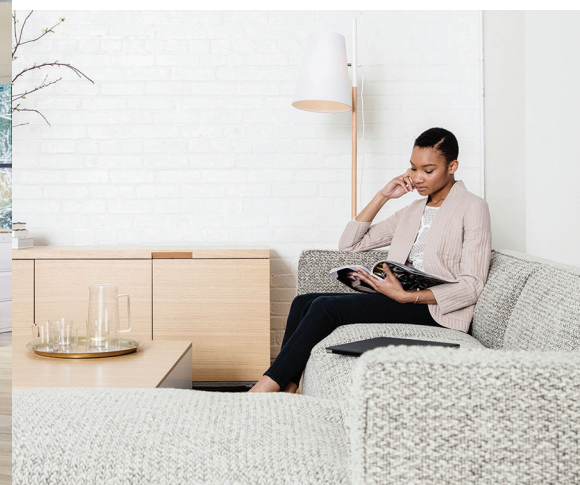

Social spaces foster connections between people, work and the places they occupy—inviting novel thinking, promoting creativity and encouraging new opportunities to reveal themselves.

Our furniture is highly reconfigurable and relocatable.

Build Community

Social spaces are where people from across the office converge. They serve to both preserve company culture and spread it throughout the organization.

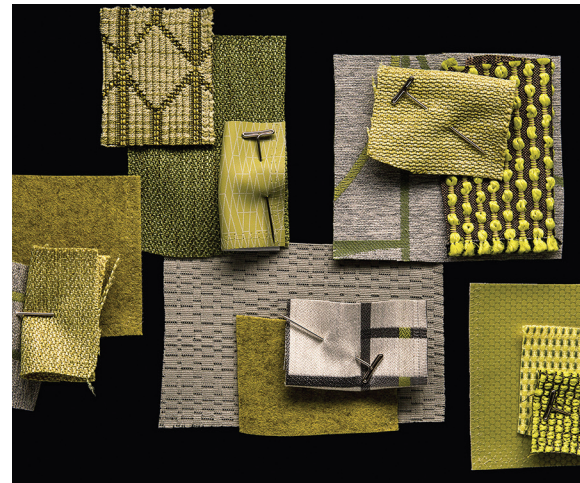

Empower Choice

With social spaces, people are free to choose how, where and with whom they do their best work.

LUUM

At Luum, we're always looking ahead and imagining the ways our collections will be used. It's why we work by hand at the fiber level to understand—and ultimately influence—how our materials will perform in the built environment. Luum fabrics allow us to offer products and finishes that work together—bringing harmony to your space.

Comprehensive Approach

A comprehensive approach allows us to provide architects and designers with a complete solution capable of wrapping every contour of the interior and unlocking the possibilities found within.

Suzanne Tick, Creative Director, Luum Textiles

Integrated Collections

Throughout the design process, we focus on creating products that work together in a holistic way.

Clear Performance Intent

We believe that design is most successful when the creative process is paired with a clear performance intent—whether it's a problem to be solved or an objective to be met.

teknion architectural interiors

At Architectural Interiors, we design and manufacture architectural wall systems renowned for performance, aesthetics and durability. Our approach is based on collaboration—constantly improving our products by carefully listening to your needs. We believe in quality as both a process and as an outcome.

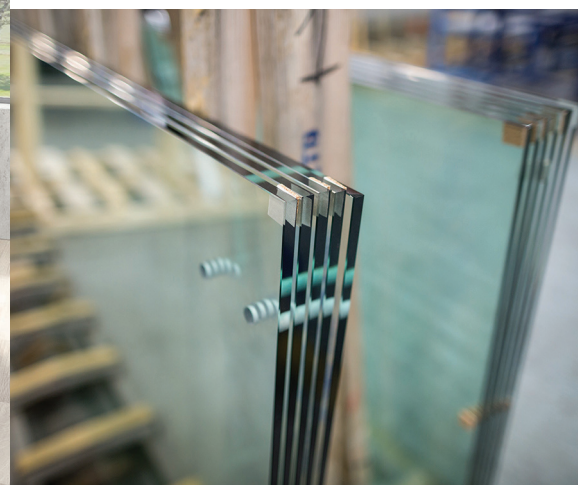

Grounded Expertise

Our products are tested and certified to the industry's most stringent structural safety, acoustic and sustainability standards, and our expert installers are integral to every successful project.

Meaningful Innovation

Despite their modest facade, walls contain lots of hidden innovation. From their design, to how they're installed, to their ability to revolutionize a space—walls are transformative and open up limitless possibilities for space division.

Detailed Design

Walls are not made to attract attention, but rather to harmonize with your space. Our walls' subtle, yet sophisticated and clean look hides the careful design decisions that are integral to their function.

Teknion furniture is designed to be adaptive and responsive to changing needs.

Our furniture connects people, technology and spaces — delivering integrated, sustainable design for a healthier, more productive world.
