

TrueBill

Agricultural Irrigation Billing

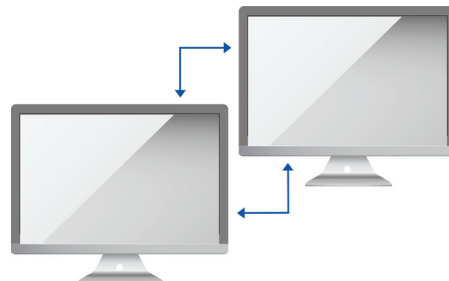

Simplify. Automate. Streamline. Improve.

All of your agricultural irrigation billing processes in a configurable, browser-based solution to improve processes, productivity, and customer satisfaction.

TrueBill provides a comprehensive approach to all of the tasks associated with your agricultural irrigation billing. With its built-in, advanced functionality and automation, it optimizes your billing processes to ramp up your efficiency, effectiveness, and productivity.

Access Anywhere

Seamless Integration

Flexible & Configurable

Irrigation Billing without Billing Irritation

Simplified, streamlined processes

TrueBill equips you to accomplish more in less time and more effectively than ever before by replacing tedious, convoluted, and redundant tasks with streamlined, automated workflows. With convenient configurable workspaces, TrueBill gives your staff an easy and accessible view of menu items for the screens and reports they access the most. And efficiency is further enhanced with TrueBill's Job Companion that allows you to reduce steps with additional workflows that you can configure as your operations grow.

Agriculture irrigation billing and management. And beyond.

TrueBill seamlessly integrates with TrueAIM, allowing you to manage all of your agriculture irrigation billing and management from one application. TrueBill with TrueAIM allows you to automate, streamline, and improve all of your agriculture irrigation billing-related processes, while tracking and managing water deliveries and requests, at the same time.

Communication made better

Save time and improve customer satisfaction with TrueBill's enhanced communication functionality. TrueBill's Notification Companion allows you to send text messages and email communications automatically, based on configurable triggers, including upcoming due dates, received payments, or specific targeted messages to your customers. Proactive communications result in an improved customer experience and fewer late payments.

Flexible and scalable

Browser-based TrueBill can be deployed on-premises or in our hosted AWS cloud environment. It's browser-based, so your staff can access it from anywhere, whether at the front counter, their desk, or offsite, at any time, and from any device with a secure internet connection. TrueBill is flexible and configurable to accommodate requirements specific to your agency, including paper or paperless billing, agency-defined billing periods and standards, rate tiers, water rights and allocations, annual assessments, monthly billing, and virtually everything in between!

Robust features to meet your specific needs

TrueBill has a full complement of components and capabilities - leverage one, some, or all to handle all of your needs:

| | |
|-------------------------|---------------------|
| Customer Billing | Water Deliveries |
| Accounts Receivable | Allocation Tracking |
| Automatic Notifications | Batch processing |
| Customer Portal | Reporting |
| Debt Management | Payments |

TrueCIP

Customer Information Portal

Empower your customers with 24/7 self-service from anywhere and any device with a secure internet connection.

User-friendly TrueCIP allows your customers to take care of the tasks that have historically required a call. Customers can pay bills, view balances, access allocation status and billing history, submit water orders, and more - all online! Customers can also view their usage and irrigation history.

With TrueCIP, call volume is significantly reduced, improving productivity and alleviating workloads on staff. And your customers' experience, satisfaction, and confidence are dramatically improved.

And TrueCIP seamlessly interfaces with TrueBill and TrueAIM, so information is always up to date.
