

U.S. BANK PURCHASING CARD

Save time and money throughout your purchasing process

U.S. Bank Purchasing Card helps reduce the costs associated with processing requisitions, purchase orders and check requests. It streamlines every step in the procure-to-pay process by offering a cost-saving alternative to initiating purchase requests.

With the cost of goods continually rising, organizations are searching for ways to streamline the purchasing process and lower costs. A U.S. Bank Purchasing Card is an ideal solution.

It helps minimize the costs associated with processing requisitions, purchase orders and check requests. Moreover, this solution simplifies and enhances all aspects of the purchasing process, including policy compliance, vendor negotiations, transaction monitoring, security, reporting and payment.

U.S. Bank helps you drive out cost by enabling your organization to do more with fewer resources. Many clients have saved as much as \$69.85* per transaction by implementing a purchasing card program. Multiply that by the hundreds or even thousands of purchases made every year and the savings are significant.

A proven solution that can be quickly implemented

This payment solution takes the paperwork out of authorizing, tracking and reconciling your organization's purchases.

With a purchasing card program, users can:

- Automatically post transaction data to the general ledger
- Help cut the costs of processing, administration, system file maintenance and operations
- Negotiate better terms with vendors
- Monitor adherence and enforce card-usage policies
- Analyze spending data by expense type, Merchant Category Code, geography and more

Increase purchase program control

Many features are available to help organizations control and/or limit spending, including:

- Velocity Monitoring allows organizations to cap the number of transactions and dollar limits per day, month or other period specified by the organization.
- Cardholder Single-Purchase Limit restricts the amount of a single purchase made by the cardholder.
- Cardholder Cycle Spending Limit caps the maximum dollar amount authorized for a cardholder within a 30-day billing cycle.
- MCC Blocking prevents purchases of specific commodities and services.

Boost efficiency and decrease cost

| Features | Benefits |
|--|---|
| Flexible authorization system and cardholder spending controls | Manages where cards are used and provides clients with the ability to block misuse and abuse at the point of sale |
| Worldwide card acceptance | Gives unparalleled purchasing access |
