Big Data & Analytics Suppliers

Collibra

Collibra helps their customers do more with trusted data. Their Data Intelligence Platform brings flexible governance, AI governance, continuous quality and built-in privacy to the world's leading brands.

IBM

For more than a century, IBM has been a global technology innovator, leading advances in AI, automation and hybrid cloud solutions that help businesses grow. IBM software comprises a diverse array of solutions designed for businesses, such as AI-driven analytics, cloud computing services, cybersecurity tools, and industry-specific applications. These offerings aim to optimize operations, boost productivity, and foster innovation within the modern digital environment.

MicroStrategy

The MicroStrategy ONE platform provides access to AI-powered workflows, unlimited data sources, cloud-native technologies, and unparalleled performance to speed up time from data to action. MicroStrategy is here to help you align the future of AI/BI technology with your company vision. With MicroStrategy, the world's most innovative companies discover new insights, create custom product experiences that users rave about, and improve operations globally.

Ocient

Ocient is the leading data analytics software solutions company for all-the-time, compute-intensive analysis of large-scale data. They deliver solutions optimized for price, performance, and efficiency on-premises and in the cloud.

Big Data & Analytics Suppliers

Ontotext

As the leading global provider of enterprise knowledge graph technology and semantic database engines, Ontotext helps enterprises to identify meaning and connections across diverse datasets and massive amounts of unstructured information. Ontotext's technology and services deliver value through semantic knowledge graphs, linking multiple structured and unstructured datasets to help customers achieve enhanced decision making, support knowledge growth and acquisition, deliver insights discovery, and ensure AI is properly educated. The company's knowledge graph technology helps businesses to connect data and define relationships to get the most out of business-critical data. The Ontotext GraphDB™ engine and Ontotext Platform are credited for powering business-critical systems in some of the largest banks, media, market intelligence agencies, car and aerospace manufacturers.

Virtualitics

Virtualitics operates a platform to merge artificial intelligence, big data, and virtual/augmented reality. Its platform enables users to visualize and understand data; and provides shared virtual office to analyze data, and present and discuss insights. Powered by a suite of AI-enabled products, Virtualitics provides a rapidly deployable end-to-end solution that quickly preprocesses and fuses data sources, builds predictive AI models, and leverages our best-in-class data analytics and visualization platform for exploration and collaboration in either desktop or virtual reality.
