## DevOps Suppliers

### Digital.AI

Digital.ai is a value stream management platform that enables enterprises to focus on outcomes instead of outputs, create greater business value faster, and deliver secure digital experiences their user's trust. The Digital.ai Value Stream Platform seamlessly integrates all the disparate tools and processes across the various DevOps initiatives, uses data and AI/ML to create connective tissue between them, and provides the real-time, contextual insights required to drive and sustain successful digital transformation.

### Harness

Harness is the only end-to-end platform for complete software delivery. Using machine learning to detect the quality of deployments and automatically roll back failed ones, saving time and reducing the need for custom scripting and manual oversight.

### HCL Software

HCL provides enterprise security platforms for the digital age through their state-of-the-art BigFix Endpoint Management and AppScan products. Both platforms have continually been recognized by the Gartner Magic Quadrant as being top security platforms in both Application Security and Security Endpoint Management and are widely used across many Government Agencies of varying sizes.

### IBM

For more than a century, IBM has been a global technology innovator, leading advances in AI, automation and hybrid cloud solutions that help businesses grow. IBM software comprises a diverse array of solutions designed for businesses, such as AI-driven analytics, cloud computing services, cybersecurity tools, and industry-specific applications. These offerings aim to optimize operations, boost productivity, and foster innovation within the modern digital environment.

## DevOps Suppliers

### Red Hat

#### Red Hat

Red Hat is the world's leading provider of enterprise open source software solutions, using a community-powered approach to deliver reliable and high-performing Linux, hybrid cloud, container, and Kubernetes technologies. Red Hat helps customers integrate new and existing IT applications, develop cloud-native applications, standardize on our industry-leading operating system, and automate, secure, and manage complex environments. Award-winning support, training, and consulting services make Red Hat a trusted adviser to the Fortune 500. As a strategic partner to cloud providers, system integrators, application vendors, customers, and open source communities, Red Hat can help organizations prepare for the digital future.

### Tricentis

Tricentis is a global leader in enterprise continuous testing. The Tricentis AI-based, continuous testing portfolio of products provide a new and fundamentally different way to perform software testing. An approach that's totally automated, fully codeless, and intelligently driven by AI. It addresses both agile development and complex enterprise apps, enabling enterprises to accelerate their digital transformation by dramatically increasing software release speed, reducing costs, and improving software quality. Widely credited for reinventing software testing for DevOps, cloud, and enterprise applications, Tricentis has been recognized as a leader by all major industry analysts, including Forrester, Gartner, and IDC. Tricentis has more than 2,500 customers, including the largest brands in the world, such as McKesson, Accenture, Allianz, Telstra, Dolby, and Vodafone.
