

A Mobility-as-a-Service app that's easy, personal, and fun to use.

Citymapper for Cities helps your transportation network thrive by encouraging riders to travel using all modes of transit, giving you valuable passenger insights to optimize your networks, and allowing you to communicate directly with your community.

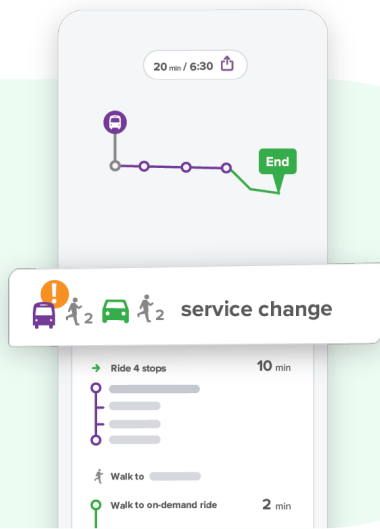

Make it easier for riders to discover transit to grow your ridership across modes.

Give your community access to a co-branded, award-winning MaaS app that attracts and retains riders by helping them easily discover, navigate, and pay for transit.

Leverage first-class insights from riders' journeys to optimize service planning.

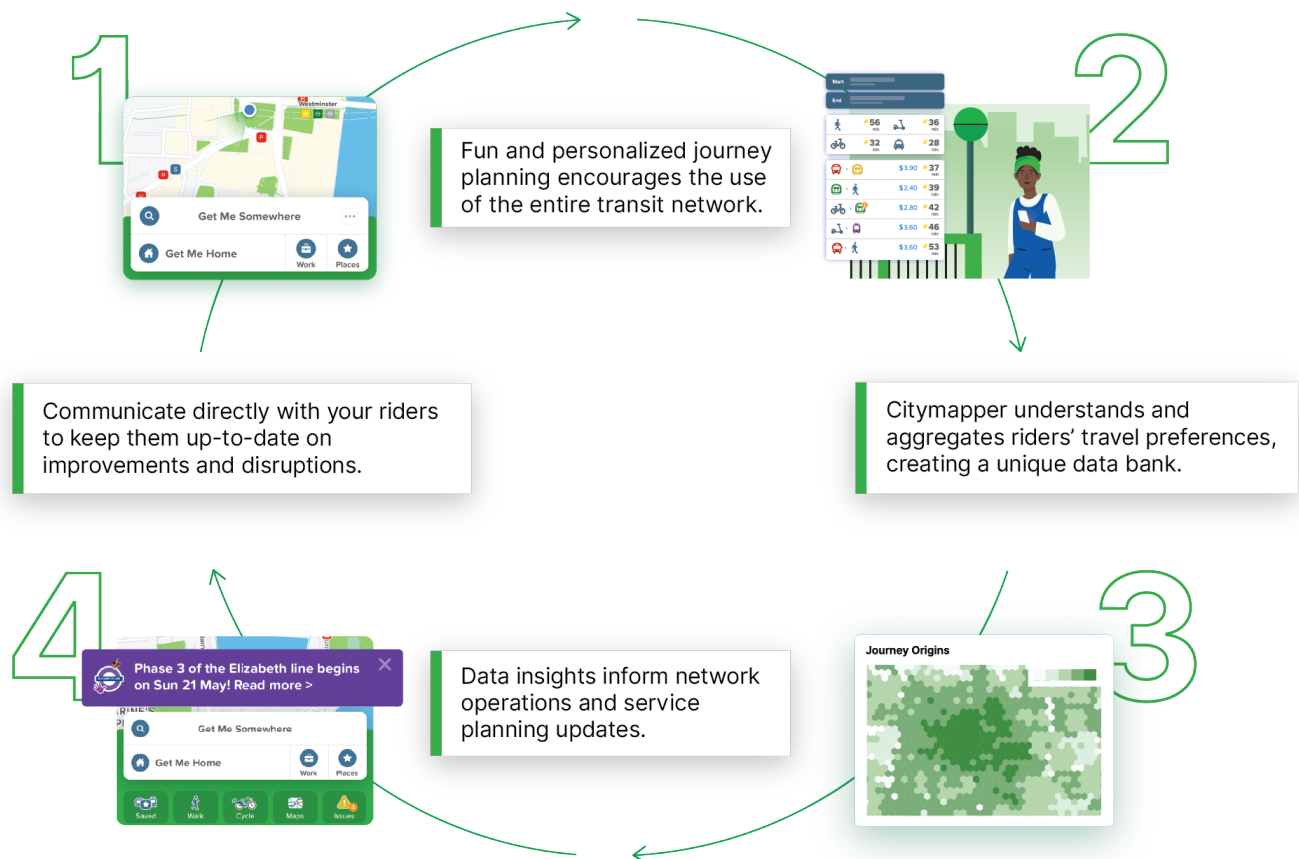

Gain access to aggregated data — from detailed demand patterns to specific bus stop usage — to better understand passenger behavior and make smarter planning and operational decisions.

Build trust in your transit network to transform occasional riders into regulars.

Deliver both real-time disruption alerts as well as geo-fenced, personalized messages about your network — including new service launches and hours of heightened demand — to keep passengers up to date on trip changes.

Better rider experiences and stronger networks.

Citymapper for Cities helps cities and agencies get a co-branded MaaS app into their riders' hands within weeks. Best of all, Citymapper for Cities seamlessly integrates into the Via and Remix platforms, making it even easier to plan, operate and optimize your network.
