

# Unlock your transit network's potential.

Bring your transit plans to reality with the world's most comprehensive, user-friendly planning and scheduling software.

## With Remix you can:

### Connect planning and scheduling.

Advance plans, see downstream impact in real-time, and accurately manage system-wide changes. Offer a platform everyone can use.

### Decide with data, always.

Data-powered workflows surface recommendations, embed insights, and help teams make confident decisions at every step.

### Offer a platform everyone can use.

Intuitive tools reduce complexity, speed up workflows, and let your team work together in real time.

### Get info to riders, fast.

Make any change—big or small—and instantly inform your riders in a few clicks.

"Remix is a game-changer. We automatically visualize service, financial trade-offs, and evaluate how proposed scenarios impact low income and minority populations in real-time."

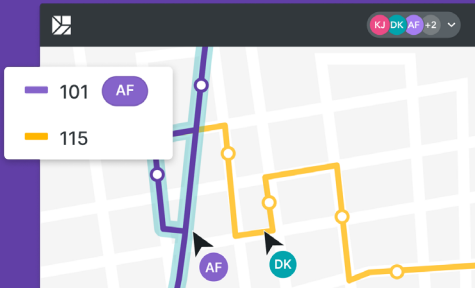

– Todd Plesko, VP Service Planning & Scheduling at DART (Dallas, TX)

# An end-to-end platform for all teams to analyze, adjust, and share in one place.

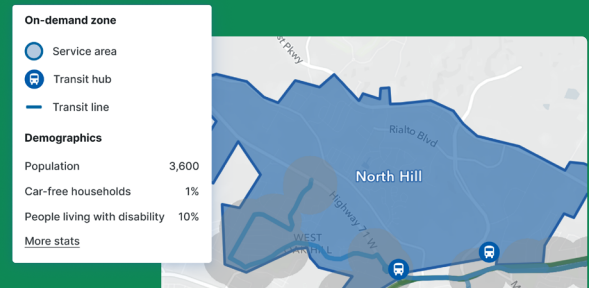

## Planning

Manage full redesigns, day-to-day service, and everything in between.

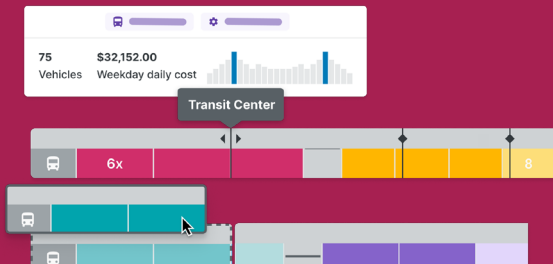

## On-demand Planning

Design on-demand services that complement your fixed route.

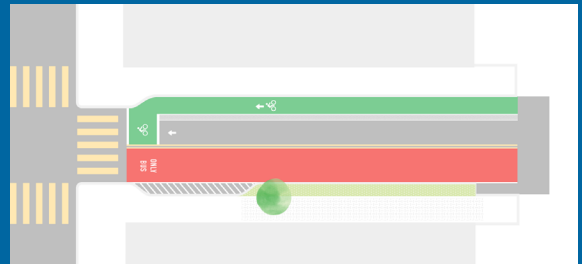

## Scheduling

Bring your plans to life with powerful algorithms that inform blocking, runcutting, and rostering.

## Streets

Move your infrastructure projects forward faster with data-driven street design.

## The results are in.

# 8X

faster planning of bus to rail connections.

- MBTA

# 20%

fewer driver shifts needed to run routes.

- North Central RTD

# 10%

increase in fixed route ridership after redesign.

- CapMetro
