Smart Sensor Flush Valve Retrofit Kits

Maintain Your Restrooms and Reputation

Enhancing your restrooms with sensor products and smart technology can make all the difference when it comes to restroom management across your campus. You can be confident in providing a better environment and user experience.

Zurn Smart Flush Valves, powered by plumbSMART™, combine touchless sensors and IoT technology to keep hands off fixtures and staff on task. What's more? Our retrofit kits upgrade most manufacturers' valves in fewer steps. You'll save costs, your staff can stay ahead of cleaning and maintenance, and your guests will be satisfied.

Reduce Labor and Staffing Challenges
- Collect real-time data for preventive maintenance and repairs
- Improve time management and completed work orders

Track Water Accurately
- Gain baseline water measurements at point-of-use
- Discover areas for improvement and track results
- Identify anomalies, avoid breakdowns and wasted water

Reduce Water and Save Energy
- Review water usage trends
- Meet WaterSense or CEC compliance with low-flow rates

Reduce Germs and Concerns
- Promote hand hygiene
- Upgrade to touchless technologies
- Meet CDC guidelines

Connect for a Better User Experience
- Keep toilets working and staff on task
- Create cleaner, more hygienic restrooms
- Leave a positive user impression

Zurn AquaVantage®	Zurn MetroFlush®
Zurn AquaFlush®	Sloan Crown®*
Sloan Royal®	Sloan GEM-2®
Sloan Regal®	
Delany Flushboy	

How It Works

Using sensors, Zurn Smart Flush Valves monitor performance and offer insights by gathering data, such as activations and water usage. The data collected gets communicated from the sensor to the Zurn Gateway. From there, the LAN or LTE† connection transports the product data to a secure Zurn Cloud. The secure Zurn Cloud analyzes your data to deliver real-time insights to plumbSMART‡.
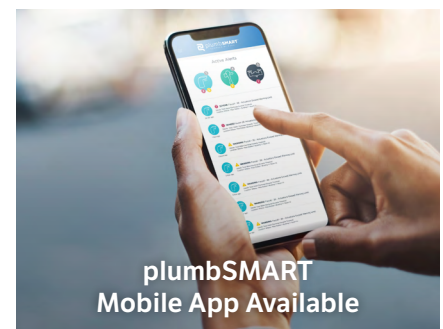

Facilities managers and maintenance personnel can receive alerts via email, text and/or push notifications based on their customizable parameters and permissions. The portal also reveals patterns and trends to allow for a deeper dive.

Install the Zurn Gateway within 1,000 feet from the connected product. Register the connected product in plumbSMART. The Zurn Gateway and plumbSMART can support your entire Zurn Smart Products portfolio.

*Sloan® is a registered trademark of Sloan Valve Company. Sloan and the Sloan products listed are not associated with Zurn or Zurn's products.

†LTE charges will apply to basic plans.

‡plumbSMART is free-to-connect to a basic plan with an option to upgrade to a premium plan.
