

Smart Battery Sensor Faucet Retrofit Kits

Keep Faucets and Users Flowing

The right technology can help you manage your campus restrooms more efficiently, while at the same time provide a better user experience.

Zurn Smart Faucets, powered by plumbSMART™, combine touchless sensors, Hydro•X Power and IoT technology to keep hands off fixtures and staff on task. What's more? Our retrofit kits upgrade your compatible Zurn faucet models in fewer steps. You'll save costs, your staff can stay ahead of cleaning and maintenance, and your guests will be satisfied.

Compatible with Z6950 and Z6955 faucets.

Reduce Labor and Staffing Challenges

- Collect real-time data for preventive maintenance and repairs
- Improve time management and completed work orders
- Change batteries once every 10 years

Track Water Accurately

- Gain baseline water measurements at point-of-use
- Discover areas for improvement and track results
- Identify anomalies, avoid breakdowns and wasted water

Reduce Water and Save Energy

- Review water usage trends
- Meet WaterSense or CEC compliance with low-flow rates
- Gain up to 10 years battery life with hydropower designs

Automate Line Purging

- Gain a sense of safety and security
- Provide hard data for compliance documentation
- Save time and staff resources

Reduce Germs and Concerns

- Promote hand hygiene
- Display real-time handwashing scores
- Meet CDC guidelines

Connect for a Better User Experience

- Keep faucets working and staff on task
- Create cleaner, more hygienic restrooms
- Leave a positive user impression

Zurn Gateway

GATEWAY MODEL NUMBERS

-LTE	ZGW-LORA-W1-LTE
-Ethernet	ZGW-LORA-W1-ETH

How It Works

Zurn Smart Faucets monitor performance and offer insights by gathering data, such as activations and water usage. The data collected gets communicated from the sensor to the Zurn Gateway. From there, the LAN or LTE* connection transports the product data to a secure Zurn Cloud. The secure Zurn Cloud analyzes your data to deliver real-time insights to plumbSMART†.

Facilities managers and maintenance personnel can receive alerts via email, text and/or push notifications based on their customizable parameters and permissions. The portal also reveals patterns and trends to allow for a deeper dive.

Install the Zurn Gateway within 1,000 feet from the connected product. Register the connected product in plumbSMART. The Zurn Gateway and plumbSMART can support your entire Zurn Smart Products portfolio.

**LTE charges will apply to basic plans*

†plumbSMART is free-to-connect to a basic plan with an option to upgrade to a premium plan
